# Context-Aware RAG Chatbot

Ask questions about AI, ML, NLP, and RAG concepts.

What is Artificial Intelligence?

 Artificial Intelligence (AI) is a field of computer science focused on creating systems that can perform tasks requiring human intelligence. These tasks include reasoning, learning, decision-making, perception, and language understanding.

You marked this response as helpful 

What is Machine Learning?

Machine Learning (ML) is a subset of Artificial Intelligence that enables systems to automatically learn patterns from data and make predictions without explicit programming.
